

Ibanez

2003 Electric Guitar, Bass, Amplifier & Effects Catalog

Have you seen the headlines? "Guitar rock is back."

We're happy to hear it. Except at Ibanez, guitar rock never "left"—and if you're the type of player who reads Ibanez catalogs, you've been too busy playing guitar or bass to worry a whole lot about the media's take on music. However, the papers are right about one thing: there are more new guitar and bass guitar styles than ever before. That's why there are more different kinds of guitars and basses in the 2003 Ibanez line up.

Our established lines have evolved. The new Edge Pro and ZR tremolo systems and other new hardware move guitar technology several generations ahead. As you page through the catalog, you'll see a greatly expanded number of Prestige models. These precision instruments combine museum class beauty with roadhouse toughness. However, don't let the silky playability or collector's item looks fool you—Prestige guitars and basses are tagged with prices the working player can afford.

We've also entered new territories. Our new RKB bass, and the new Artcore, S2 and Jet King guitars are specifically designed for the new playing styles—but they'll also work perfectly for anyone who just wants quality, tone and plug-and-play simplicity. And after several years of requests from both Ibanez artists and retailers and a whole lot of R&D, we're ready to roll out our first 100 watt stack and combo amps as well as our first amp with DSP.

With so much new guitar and bass gear, the whole question of where the guitar went seems kind of pointless. Besides, for those of us who love guitars and basses—whether for garage rock, neo-metal, jazz, country, r&b or stuff that's too new to have a name yet—there have been, are, and always will be guitars.

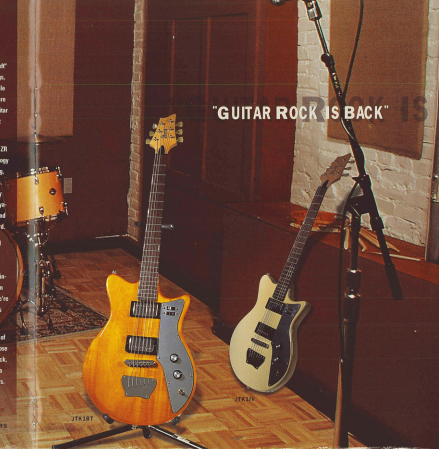

Peace.

DAVID DIXIE (DIVISION OF LAURA LEE) WITH THE JTK18RS

Prestige

Ibanez Prestige guitars and basses are crafted of premium woods by our most experienced luthiers using the perfect blend of New World technology and Old World craftsmanship. Identifiable in this catalog by the Prestige logo, Prestige models feature necks with the comfortable rounded head previously in vintage instruments, linkage in 14 years of dedicated playing. 2003 models also feature new electronics and deluxe appointments precision crafted to very high tolerances.

"Duct tape is so much a part of what we musicians do on the road—plus there are already lots of pretty guitars on the market that are very expensive, but aren't really "players." But this is a real, rugged, solid guitar that's also unique. Each guitar is individually wrapped, so every one is going to have its own 'fingerprint.' You're not going to find another guitar like it. And on top of all that, it's just an easy playing, versatile guitar that you can get a bunch of great sounds out of. I really am stoked with how this has all turned out."

-Noodles

KEY FEATURES

- Based on the classic Gibson Telecaster models that Needles has played since 1983.
- Basswood body hand wrapped in duct tape and finished in high-gloss poly.
- Fixed bridge with steel saddles offers durability, simplicity and strong sustain.
- Special 5-Way switching provides a wide variety of pickup combinations.

Fixed Bridge

The NDM's fixed bridge with steel saddles provides simplicity, sustain, and full tone.

Thin-Body Stringing

Thin-body stringing offers a improved articulation with greater sustain.

NDM1TSG

- 2 pc neck
- basswood body
- medium frets
- fixed bridge
- left neck pu
- s12 bridge pu
- left1 middle pu
- medium signal stained ply

Infinity Pickups

Special infinity pickups to hum along with a unique 50k coil with Special 5-Way switching pump out a real soundbark of tone.

"Why a baritone? Because it goes to 11. With the baritone guitar's higher neck tension, I can tune down low and play with heavier strings and not have them feel like rubber bands. With a regular guitar, tuning down can become a real nightmare with the guitar going in and out of tune. But with my signature guitar, I can bite into it and play aggressively."

- Mike Mushok

KEY FEATURES

- Matte finished mahogany body and thru-neck provide gargantuan tone and sustain.
- 28" scale baritone neck offers the ability to achieve all kinds of low tunings.
- Saper 58 pickups custom wound for baritone.
- Tuning machines feature low string posts for higher string tension all the way.

MMM1MOL

- 2 pc thru-neck
- mahogany/walrus wood body
- medium frets
- rose bridge
- saper 58 neck pu
- saper 58 bridge pu
- color: mahogany 61

Thin-Body Stringing

Thin-body stringing offers a improved articulation with greater sustain.

MM Bridge

Massive MM bridge made designed for Mike Mushok offers natural sustain, performance and supports the MMM's great sound.

Custom Wound Saper 58 Pickups

Classic Saper pickup made, wound for the baritone. Best tone of a baritone guitar.

SZ & S-CLASSIC SERIES

Evolution doesn't have to mean more complicated. The SZ and SCA S-Classic series and the new SZ have melted into more similar instruments than their finest S ancestor. The comfortable alien body with its mahogany top and sustain that make the S famous is there—but the SZ and S-Classics feature simple fixed bridges and a 25.1 scale neck that has a different feel than the S guitar's 25.5 scale.

The SZ is the first S-derived design to feature a top in need, which provides greater sustain and more consistent pickup shielding. The body's winged body design supports the SZ's full tone and sustain.

The body's winged design offers increased sustain and improved articulation.

KEY FEATURES

Thru-body, staggered stringing compensates for different string thicknesses and provides superior tonal balance, feel, articulation and sustain.

3 pc set in neck for better upper fret access and sustain.

Oiled maple top and slightly thicker S mahogany body provide incredibly full sound with a wide range of overtones.

New Gibraltar III bridge offers fixed bridge simplicity and sustain. No sharp edges for longer string life.

AX & GAX SERIES

AX and **GAX** guitars have everything you need (and nothing you don't) for heavy-duty modern rhythm and lead playing: two humbuckers, a three way switch, and a crystal cut body of mahogany or agathis. Our **GAX** guitars started out as the best selling inexpensive Ibanez guitars in our history — now they're one of the best selling guitars of any kind in the world.

JS SERIES

It took many years to create guitars that could satisfy the Master of Tone—but the results have been worth it. Joe Satriani's signature guitars aren't simply a tribute to the man who has kept the torch burning for instrumental rock, they're the perfect vehicle for an artist who can get as much intensity into a whole note as he does with a light speed phrase.

KEY FEATURES

- Lightweight, aerofoil-shaped basswood body provides comfort, upper fret access and expressive, singing tone.
- Multi-radius Prestige neck (JS1000/JS2000) is an exact digital rendering of the neck on Joe's favorite axe.
- Combination of 25 1/2" neck scale and DiMarzio or Ibanez Axis pickups allows wide dynamic range and tonal versatility.
- JS1000 Prestige models feature the new Edge-Pro double-locking tremolo system. 2003 JS190 standard models are equipped with the new Edge-Pro II double locking tremolo system.

For more info on the new Edge-Pro and Edge-Pro II tremolos, see page 34.

JEM SERIES

The debut of Steve Vai's JEM in 1987 and the introduction of his Universe 7-string changed everything. It's impossible to think of any one person who has done more for the evolution of Ibanez guitars than Steve Vai.

JEM FEATURES UNIVERSE

- Centered basswood or alder bodies with 24-fret JEM neck provides easy access to all registers.
- Deep routed tremolo cavities allow pitches to be lowered or raised.
- Vai's choice of specific DiMarzio® pickups for each model, combined with Ibanez Split-5 wiring provide incredible tonal versatility.
- Steve Vai's Universe—the guitar that ignited the 7-string revolution allows almost effortless transition from 6 to 7-string techniques.
- 2003 JEM and Universe models feature the new Edge-Pro and Edge-Pro II double locking tremolo systems.

RG SERIES

For 2003, the RG guitar line—the unchallenged standard in hard and heavy rock guitars—gets a massive infusion of high tech hardware and upgrades. Our classic RG550 and RG570 models (new RG1550 and RG1570) reach new levels of lethal with the addition of Prestige necks and the new Edge-Pro tremolo system. Many deluxe and standard models have been upgraded with the new Edge-Pro II tremolos. The 2003 lineup offers every kind of instrument needed by the heavy rocker: 6 and 7 string models, neck-thru and bolt-on axes, double locking and standard tremos and an equally wide range of prices.

- dimarzio paf pro bridge pu
- color: 15, 1v

KEY FEATURES

- For over 15 years, the undisputed standard in guitars for the hard rock player.
- Pickups and pickup placement provide the hard-edged cutting tone needed for heavy rock.
- 24 fret thru, flat and feat Wizard and Wizard II necks. Resaver Ultra necks available on RG1510 neck-thru body models.
- Wide assortment of bridges: Hard tail, synchronized tremos and the new Edge-Pro and Edge-Pro II double locking tremolo systems. Double Edge-Pro models feature piece placement for adding acoustic guitar tones.

PGM MODEL

Like the incredibly gifted artist it was designed for, Paul Gilbert's signature model is capable of both style and speed.

KEY FEATURES

- The perfect combination of features for both stylistic versatility and light speed picks.
- 25.5 scale PGM neck is 2mm thicker than our super-thin, super-fast Wizard necks.
- 2003 PGM models are now equipped with the Edge-Pro double locking system which offers improved stability, sustain and smoother operation.

GRX SERIES

Don't settle for less. With Ibanez less backs doesn't mean less looks or less tone. Ibanez GRX guitars have the humbuckers you need for heavy rhythms and riffs and exciting finishes worthy of a pro rock. To make sure none of the great tone gets lost in the sauce, GRX 6-string models feature the FAI-10 tremolo.

K7 MODELS

Ibanez proudly pays tribute to the two players who ignited the resurgence of the 7-string in rock. K7 Korn signature models come with factory set "A" tuning and all kinds of Heed and Manly inspired specs such as DiMarzio® PAF-1™ pickups and jumbo in the dark side dots. Their unique U-bar trem system, which can also be used with a standard arm lets you palm the bridge for true effects without palming the five tones.

KEY FEATURES

- Ibanez defined the solid body 7-string. We have more experience with solid body 7-strings than any other guitar maker.
- RG models feature DiMarzio and DiMarzio® pickups designed exclusively for 7-strings.
- Available in both high-end Prestige and affordable GRX models.
- The right bridge and nut spacing mean Ibanez 7-string guitar necks feel like guitar necks—not like backs. Transition from 6- to 7-string playing techniques is effortless.

color: flt

Sixteen years ago everyone "knew" that flat mahogany tone and sustain equaled weight and discomfort. Then the S changed everything. The S is thin around the edge to give you great comfort, and thick around the neck, pickups and bridge to give you great tone. The 2003 S line offers both double locking and synchronized tremos, some including built-in piezos so the S can add acoustic clarity to its signature mahogany tone and sustain.

KEVIN CADOGAN (TRUST NO ONE)

CHAD GRUBERS (CRY)

JASON DOO COSTA (REVEREND)

STEVE S. HANSON (SIX FEET UNDER)

KEY FEATURES

- Big, heavy tone without the big heavy body. Super sleek S guitars provide complete playing freedom and comfort. New finishes complement the unique S arched back and top.
- Thin fast, and flat Wizard and Wizard II necks allow effortless fretwork.
- 2003 models feature the ZR Zero Resistance tremolo, a major technological advance in tremolo smoothness and tuning stability.

For more info on the new ZR tremolo, see page 54.

KEY FEATURES

For players who want S sleekness, but with a standard flat back.

25.5" neck scale offers narrow feel and tight tension similar to an RG.

Unlike other brands in this price range, SA and GSA models receive the same individual inspection and set-up as our most expensive models.

- color: bk

One of the first original Ibanez designs, the Artist remains the more comfortable AND more affordable alternative to the other famous two-humbucker mahogany guitar. And this classic has the superior hardware.

The DTX Destroyer and ICX Iceman are more modern and compact versions of two Ibanez classic rock and roll axes.

There's no mistaking the Iceman for any other guitar. Definitely not in sight and certainly not in sound. Nothing says or plays rock and roll like the Iceman.

Set-In Necks
 Most flat and semi-acoustic in the Artcore price range use drop-in-necks for set-in necks. Artcore guitars feature palm-heeling crafted set-in necks for fuller tone, more sustain and easier upper fret access.

ARTCORE SERIES

When Artcore guitars debuted in summer 2002, they turned the music industry upside down. No longer were full and semi-acoustic guitars just big expensive jazz boxes for jazz players—even some of our competitors bought them in, we're not making this up). With Artcore guitars you get an amazingly affordable price plus the quality and tone you expect from Ibanez, the guitar company with over four decades of experience making full and semi-acoustic guitars.

KEY FEATURES

- Huge assortment of styles... from big and small bodied full hollows to small bodied semi-acoustics, including the classic Ruess Takson shape.
- Original design Vintage Vibrato with roller saddle bridge. All the great vibe of the classic trem—with none of their traditional tuning glitches.
- Median output Artcore pickups accurately reproduce the cool, complex tones of a hollow AND work well with effects.
- The great upper fret access and sustain of a set-in neck at the price of a bolt-on.

**Ibanez Vintage Vibrato**

Former Ibanez owner Tomoyasu Hoshino offers three versions of the Ibanez roller saddle bridge that recreate the great vibe of the old trem, with one major difference: zero wobble. Fully functional roller saddles on the ART1 bridge help eliminate the tuning, intonation and glitches that kept the traditional systems short of complete confidence.

ARTSTAR SERIES

Most of the time, Ibanez is known for being "anything but traditional." But when it comes to our full hollow jazz guitars, we are strictly traditional. Which is why our AF full hollow jazz guitars are truly full hollow: you won't find the soundblocks you find in many so-called "full hollow" guitars.

On the other hand, our AS models are designed for jazz and then some. So you will find maple soundblocks, fitted precisely into the tops and backs of AS guitars, to reduce feedback and increase sustain.

AF207BS
 - arctic 7 neck
 - spruce top/maple back/bottom
 - medium frets
 - ebony bridge
 - diamond black II neck pu
 - color: bc
 - depth: 45mm
 - 11.50" at tail

 - full tone II bridge
 - super 58 neck pu
 - super 58 bridge pu
 - vintage 5e
 - depth: 45mm
 - 11.50" at tail
 - width: 16"

KEY FEATURES

- AF models are true full hollow bodies with standard jazz bracing.
- AS semi-acoustics feature sound blocks to reduce feedback and increase sustain.
- AF207 is the seven-string jazz box the working player can actually afford.

ERIC KNOTT (SEATTLE)

LUIS RODON (MIAMI)

TOM THORDARD (TRINIDAD)

CHRIS CARUSO (MICHIGAN, BOSTON)

JSM MODEL

Based on the AS200AV, the longest running model in our history, the John Scofield signature models is a well deserved tribute to the man whose artistry who made the AS200AV famous. The JSM100VT has all the features John loved in his old AS290 and all the new features he wished it had.

KEY FEATURES

- Succeeds the classic AS200 with design and features ordered by the AS290's most famous player.
- ARJAS style headstock for better balance.
- Gotok 510 machines, Super 58 pickups and traditional 500 output jack.
- Classic hollow half-brass, half-bone nut for perfect balance at highs and lows.

JSM100VT
 - arctic neck 25.40g
 - flame maple top/maple back/bottom
 - medium frets
 - 60/500 bridge
 - super 58 neck pu
 - super 58 bridge pu
 - color: vt
 - depth: 45mm (11.80" at tail)
 - width: 16"

"The JSM100 is a top-of-the-line instrument built as flexible as a workhorse, but designed for players who can appreciate the finer qualities in a guitar's design and features."

- Luis Rodon, Vintage Guitar Magazine

"The guitar is as good as the player whose name is on it."

- David Downard, Downbeat Magazine

GB & PM SERIES

In the mid-'70's, virtuoso George Benson had a vision of the cutting edge features a jazz guitar needed to survive in the new world of amplification — and the durability it would need to survive on the road (which his expensive traditional boxes were having a tough time doing). Twenty-five years later, this modern jazz classic is our longest running signature model.

For players desiring a more traditional jazz line, George Benson and Burns also offer the GB2000S which features a full hollow body with traditionally mounted pickups.

KEY FEATURES

- Pure jazz tone at any volume.
- Floating pickups, a thicker top and a smaller body reject feedback.
- Special ebony bridge completely transfers tons from strings to the top.
- Die-cast bridge allows separate intonation adjustment of treble and bass strings.

GB2000S

- gb neck $\frac{11}{16}$ "
- spruce top/back/sides
- medium frets

JUMPSTART PACKAGES

Listening to music is great. Playing it is better.

Jumpstart guitar and bass packs provide the fastest way to find your way out of the seats and onto the stage. You've got everything you need: axo, amp, electronic tuner, instruction video, a gig bag (because you do want to gig, right?) and more. And although Jumpstart packages are affordable, they're a vast distance from generic, so-called value packs. Jumpstart has name brand, good stuff that you can still use when you get good yourself. And every Ibanez Jumpstart guitar and bass is inspected and set up according to the same standards as the most expensive Ibanez axes.

BASSES

Elixir

Ibanez is proud to feature Elixir® NanoWeb strings on all Ibanez 600 to 2000 series basses and the new STC300

RKB MODELS

Traditional doesn't have to mean the same old stuff. Ibanez combines all the best traditional features in an all-new pro bass—there's absolutely no need for hot rodding. The RKB was made for players who want a full sized bass that pumps out pure wood tone without any electronic coloration.

SRX SERIES

SRX SounEgear Xreme basses were designed for players who want an easy-to-play bass with simple controls and "beyond massive" pickups that can pump out loud, heavy rock. Period.

However, for players for whom simple and powerful just aren't simple and powerful enough, we've added the new "plug in and pulverize" SRX600's. Loaded with a single PFR-AL active magnet pickup and the new PHAT II active bass boost, SRX600 basses prove that ridiculously loud and great tone aren't mutually exclusive terms.

BTB SERIES

The BTB Series provides all the features, quality and sound of a boutique bass with one significant omission: no expensive boutique price tag. Everything else is here: the pickups are passive, the body is full, and the neck is substantial. With the BTB's extra long neck scale, the tension is nice and tight—there's no flopping in the low end and the high strings ring out and sustain better. For 2003 we've added the even more affordable BTB300 for players who prefer the size, feel and tension of a standard 34" scale neck.

KEY FEATURES

- Custom designed Bartolini active ED's and passive humbucking pickups (on BTB500/1000 models) designed for the 35" neck scale.
- 18 volt ED circuitry provides much greater headroom than based on standard active ED's (except BTB300).
- 35" neck scale provides superior articulation. Perfect for 5-strings and detuned 6-strings. Standard 34" scale is available on the new BTB300.
- Off-center line neck shape (BTB500/1000) makes upper fret work as easy as playing the lower frets.

Sleek, sexy and sonically versatile are the reasons Soundgears can be found in every kind of music from gospel to goth to garage rock. Bassists who want the power and versatility of active electronics and fastest neck available have made the Soundgear standard equipment in the most controlled studio environments and the most out-of-control live performances.

KEY FEATURES

- Thinner necks with thinner rats than traditional basses.
- Sleek bodies that are lightweight, balanced and comfort oostered.
- Active EQ's perfectly matched with the right choice of passive or active pickups.

Five Piece Neck Construction
5 pc wenge/ebony neck on the new SR400 models ensure great strength, stability and tone.

More and more players are passing up the lifeless looks and tired tones of "beginner basses" and going to GSR Soundgear basses—which is why GSR Soundgears are now the most popular basses in their price range in the world. With GSR Soundgears, you get the looks, tone and comfort—and the same warranty, rigorous set-up and inspection—of our most expensive basses. 2003 GSR models come equipped with the pro B10 bridge for even better tone and stability.

SR5/6/6 SERIES

If you've wanted the added low-end of a low B string – or you already have one but never felt comfortable with the additional neck girth – consider the incomparable virtues of a Soundgear 5-string. Ibanez Soundgears are fitted with the thickest neck of any 5-string anywhere. And while the necks and nuts are narrow, the selection of Soundgear 5-strings is as wide as it gets—everything from low price to high Prestige and everything in between.

With a 6-string, there are no limits; you can plumb the depths with the low-B string or explore the stratosphere with the high C. The Soundgear's design is perfect for the 6-string. The Soundgear's slender but strong neck has just the right spacing and the pickups perfectly balance the different outputs of the low and high strings.

KEY FEATURES

- Thinner necks with thicker nuts than traditional basses.
- Sleek bodies that are lightweight, balanced and comfort contoured.
- Active ED's perfectly matched with the right choice of passive or active pickups.

EDC SERIES

For 2003, the ultra-modern EDC takes another step beyond. The addition of a new triple coil pickup with three settings—*trad*, *bright* and *attack*—makes the ergonomic EDC capable of rapid and radical changes in tone.

KEY FEATURES

- Ergonomically shaped body features built-in thumb rest, a scooped out area to get under the strings, and a raised control area so you don't have to lean over to check settings.
- Extra long hair balances the bass so you don't have to.
- Unique triple coil passive hair-backing pickup with active ED allows instantaneous tone changes.

The EDC's essential passive triple coil hair-backing pickup, available in passive 3-band ED, and three way selector switch (trad, bright, and attack) allows wide and instantaneous changes in tone.

MIKE D. (MIKE D'ANTONIO) (KISS, THE BRONX)

EDB SERIES

The most traditional in appearance of the Ergodyne basses, the EDB's ergonomic body still offers a radically curved back for comfort and a scooped front for slapping.

KEY FEATURES

- Resonant Luthite bodies offer ergonomic comfort and dynamic tone.
- Strong, slender two-active maple necks offer fast and easy fretwork.
- Passive pickups and active ED are specifically selected to enhance the resonant Luthite material.

EDA SERIES

For everything else in life, you'll have to wait to see what the future will bring. But in bass, the future is already here. The Ergodyne EDA's beyond modern Luthite body and magnetic and piezo pickups deliver more tones, more dynamics, and more playability—at a price you would have expected from the past.

KEY FEATURES

- The ultimate Ergodyne. Fantastic Luthite body offers unprecedented comfort and balance.
- Combination of magnetic and piezo pickups provides warmth without distortion, even at high volumes.
- Smaller headstock provides much more consistent fret-to-fret response.
- Low profile bridge and wider neck provide optimum spacing for right and left hand fingering.
- Reversed tuning machines allow straight line stringing from nut to post for better tuning and more consistent string-to-string tension.

K5 MODEL

The K5 bass pays homage to Fieldy's huge contributions to the art of heavy rock bass playing. The K5's combination of woods and active electronics is capable of generating any kind of sound, most especially Fieldy's signature no-mid-range massive tone. Says the man himself, "the K5 is a masterpiece."

KEY FEATURES

- Powerful ADX active pickups and the original Vari-Mid EQ with sweepable midrange allow you to dial in (or dial out) any kind of bass sound.
- Body of padauk and mahogany provides the tremendous low end and sustain needed for Korn's brand of heavy rock.

KSOL

- Spruce/gambel maple neck
- padauk/mahogany/padauk
- medium frets
- 600-ohm 5 bridge
- cutaway pie
- reliable pie
- var 1-100
- colors: rd, bl

GWB1NTF

- Spruce/gambel maple neck
- light ash body
- fretless
- standard 5 bridge
- bartolini grab bridge pie
- bartolini mid eq
- colors: rd, bl

GWB1TKF

- Spruce/gambel maple neck
- light ash body
- fretless
- standard 5 bridge
- bartolini grab bridge pie
- bartolini mid eq
- colors: rd, bl

GWB MODEL

Gary Willis' absolute mastery of the fretless is well documented in recordings with Tribal Tech, Wayne Shorter, Allan Holdsworth, Hubert Laws, Joe DiDorio and his own solo recordings. He is also one of the finest bass instructors in the world—his seminars on bass are a must for players who want to take their playing to the next level. Gary's no-frets fretless bass personalities aid and facilitates his total tonal and dynamic control.

KEY FEATURES

- Bartolini NTBT 2-band EQ with bypass switch matches any kind of amplification.
- Lightweight swamp ash body provides an extremely open sound.
- Carved Bartolini Willis pickup features separate coils for precise string balance.
- Detachable ramp/finger-rest designed by Gary Willis helps fine-tune right hand technique.

DWB MODEL

First call New York City session man Doug Wimbish (Living Colour, Mos Def) has a new groove for 2003. His all-new DWB3 signature bass features neck-thru body construction that gives his formidable technique free rein and a custom 2-band EQ that lets him instantly dial in the vast range of different tones he requires.

KEY FEATURES

- 5 pc maple/ebony neck with quarter-sawn bubinga fretboard offers superior strength, tone and fret response.
- Neck-thru body with ash wings allows unlimited upper fret access.
- Hipshot® licensed tuners provide tuning stability combined with lighter weight for better neck/body balance.
- 2-band EQ customized by Doug Wimbish offers wide and rapid tone adjustments.
- EMG® 35P4 and 35J active pickups.

DWB3TO

- Top DWB maple
- Bubinga neck
- Light ash wing
- Medium frets
- Accurate 1:200

ELECTRONICS

Why is the newest name in amps the fast growing name in amps? Because Ibanez recognized that the world didn't need another amp dedicated to recreating the sounds of yesterday. Instead we came with amps spec'd and voiced for today's tones. Obviously, we did something right, because players and retailers kept telling us they wanted more—and they wanted bigger. For 2003, after endless hours of R&D and testing, here is more and bigger: the new Ibanez 100 watt stack and combo amplifiers.

Our 100 watt Tone Blaster aren't for players looking for something that imitates what's already out there—old or new. Ibanez amps have their own sound character. They're designed for players who want a powerful amp with raw, edgy and aggressive tones—and doesn't sound like anything or anyone else.

Tone Blaster cabinets feature closed backs for tight low end. The 4 x 12 cabs are divided into two separate compartments of two 12's each so there's no sound compromise caused by standing waves. Tone Blaster speakers were designed to have the tight bottom end of the classic British 12's, but with more treble response (especially useful for players who use a lot of distortion).

- TB100R Tone Blaster**
- 100 watt combo guitar amp with reverb
 - 2-12" "POWER JAM" speakers
 - Two footswitchable discrete channels (clean and crunch)
 - Independent active 3-band EQ and level controls
 - Footswitchable mid-shift on the passive channel
 - "Crunch" circuit available on the clean channel
 - Effects loop
 - Headphone jack
 - Footswitch jack
 - Closed-back cabinet design
 - Speaker extension jack
 - Four button metal footswitch

TB212 Tone Blaster

- Extension Cabinet
- 2-12" "POWER JAM" speakers

- TB100H Tone Blaster**
- 80 watt head with reverb
 - Two footswitchable 8-ohm voice channels
 - Clean and crunch semi-independent active 3-band EQ and level controls
 - Footswitchable mid-shift on the passive channel
 - "Crunch" circuit available on the clean channel
 - Effects loop
 - Headphone jack
 - Footswitch jack
 - Four button metal footswitch

TB412A Tone Blaster

- Angled front speaker cabinet
- 4-12" "POWER JAM" speakers
- Switchable mono/stereo

TB412S Tone Blaster

- Straight front speaker cabinet
- 4-12" "POWER JAM" speakers
- Switchable mono/stereo

Heavy Duty Metal Footswitches

Many 100 watt amps feature plastic footswitch assemblies, but Ibanez 100 watt Tone Blaster amps come standard with heavy-duty metal footswitch units with LED indicators.

TON TONE BLASTER GUITAR AMPS

For 2003, Ibanez is proud to unveil our first amp with on-board digital signal processing. The new TB150 Tone Blaster with DSP features 15 different effect settings for more great sounds than you'd ever expect from such a portable package—which makes the TB150 perfect for home studio recording and rehearsals.

TB25R Tone Blaster

- 25 watt guitar amp with reverb
- 12" "POWER JAM" JBL® speaker
- Switchable gain
- Active 3-band EQ
- Footswitch jack
- Headphone jack
- Open-back cabinet design

TB50R Tone Blaster

- 50 watt guitar amp with reverb
- 12" "POWER JAM" JBL® speaker
- Two footswitchable discrete channels (clean and crunch) w/ independent active 3-band EQ and level controls
- Footswitchable mid-shift on the overdrive channel
- "Crunch" circuit available on the clean channel
- Speaker extension jack
- Effects loop
- Headphone jack
- Footswitch jack
- Closed-back cabinet design

TB225C Tone Blaster

- 22.5 watt stereo guitar amp with reverb
- Clean and overdrive and depth controls
- 2 x 12" "POWER JAM" speakers
- Two discrete channels (clean and crunch) with independent active 3-band EQ and level controls
- Footswitchable chorus and channel switching
- Headphone out
- Effects loop
- Open-back cabinet design

TB15R Tone Blaster

- 15 watt guitar amp with reverb
- 8" "POWER JAM" JBL® speaker
- Active 3-band EQ
- Clean and overdrive channels
- Headphone out
- CD input
- Closed-back cabinet design

TB150 Tone Blaster

- 15 watt guitar amplifier with DSP
- 15 effect settings including reverb, chorus, flange, and octave
- Independent stereo distortion
- 8" "POWER JAM" JBL® speaker
- Active 3-band EQ
- Clean and overdrive channels
- Headphone out
- CD input
- Closed-back cabinet design

SELECT

IS210 (shown on page 38)

- 50 watt guitar amp
- 8" JBL® speaker
- 3-band EQ
- Switchable bass
- Headphone output

SOUND WAVE BASS AMPS

Our backstage 90 and 20 watt bass amps have the clarity and booming lows of the big rigs and they easily handle passive or active basses. Our SW35S and 95 watt models tilt-back models have the power and features suitable for small venue performance.

SW65 Sound Wave

- 65 watt dedicated bass amplifier
- Tilt-back design
- 12" speaker with phase inverter
- Active 4-band EQ
- Limiter with LED indicator
- Variable input with 10dB gain
- Master volume control
- CD inputs
- Headphone out
- Line out
- Effects send and return
- Closed-back cabinet

SW35S Sound Wave

- 35 watt dedicated bass amplifier
- 30-degree design
- 8" coaxial speaker for wider frequency response
- Active 4-band EQ
- Limiter with LED indicator
- Variable input with 9dB gain
- Master volume control
- CD inputs
- Headphone out
- Effects send and return
- Closed-back cabinet

SW20 Sound Wave

- 20 watt dedicated bass amplifier
- 8" cone speaker for wider frequency response
- Active 4-band EQ
- Limiter
- Variable input with 10dB gain
- CD inputs
- Headphone out
- Closed-back cabinet

BZ10B (shown on page 38)

- 10 watt dedicated bass amp
- 5" JBL® speaker
- 3-band EQ with presence control
- Headphone out
- Extended closed-back cabinet for "gritty" bass tone

DE7 Stereo Delay/Chorus
Add new dimensions to your sound with the DE7 Delay/Chorus pedal. Set the best of both worlds: high-tech digital sounds compatible to expensive rack units or warm vintage tube-echo sounds all with a simple flick of the switch. TONE, REPEAT and LEVEL controls help you dial in just the right amount of delay while stereo outputs can be used for a more spacious sound. With a range of 280ms to 3.8 seconds, the DE7 is the only sound solution for every playing situation.

CF7 Noise Cleaner/Finger
The CF7 cleanses all manner of unwanted noises, whistling or piano sounds, and compensates "flurry" strings and blurs. The action "BRACE" switch lets the CF7 be a conservative Dr. Jekyll with the "GRRR!" mode to take the control over the proverbial Mr. Hyde...the "WAGGLE" mode imitates the contemporary modulation sounds you'll hear today's electric rock bands. It's like getting two pedals in one.

AW7 Ampwork
There are imitators. And there are originals. But the Tone-Lok AW7 isn't just any imitator. It's got standard wah pedals both the highs and lows are cut and it's got a smooth setting where only the highs are cut. And it's got distortion. A smooth filter provides the sound of a standard wah pedal with a crisp setting to favorite rock pedal techniques of Joe Satriani. You can even change the chain order of the effects to get different tones either distortion to push or wah to distortion.

PH7 Phaser
Designed to emulate the effect of a rotating speaker, the PH7 has a selectable phase circuit capable of either four or eight stages of smooth phasing. With three from every different level modes, you can go from a subtle shimmer to all out '70's Let's Get Funky phasing.

PM7 Phase Modulator
If you've gone through one phase after another, maybe it's time for the first phase. The PM7 Phase Modulator offers three types of oscillators to give you everything from classic phaser (D.U.) effects to low-voiced quack. Since good things come in threes, the PM7 also has three phase stages: wah, deep and wide, and deep and pronounced. With some minor tweaking, the PM7 goes from fresh tone to 21st century and beyond.

TONE-LOK
EFFECTS PEDALS

SB7 Synthesizer Bass
If you're looking for new tones in your rig, all combining with maximum against your teeth, keyboard players who look for a bit more funk in the 80's, the SB7 is the ticket. You get real-time funk—in other words, no annoying tracking delays and delays. You can even play chords.

PD7 Phase/Dist
Why do guitarists take the stage? Loaded with growling low-end distortion, the PD7 gives the playing field for the rock band. The PD7 is armed with three pre-amp style voicings and an attack control switch, which adjusts the amount of harmonic content in your sound. With DRIVE, LS, HL, and ERG modes, dialing in a Thunderbox bass sound has never been easier.

TONE-LOK EFFECTS

On the outside, Tone-Lok effects are equipped with our exclusive "set and forget" Push-Lok rotary pots. Push the knobs down and your tone settings lock securely inside the case. No more lost settings or knobs broken by club-footed club owners staggering about the stage.

On the inside, Tone-Lok pedals feature hi-fidelity components carefully tweaked with the constant input from a new generation of Ibanez players. And all this great stuff comes in cool looking, road tough metal boxes at prices the working player can afford.

FZ7 Fuzz
For real, a complete 80's feedback with some of the drawbacks, the FZ7 is the ultimate in push-button fun. With the FZ7's tone, drive, and level controls, it's never been easier to get the right tone. You can even engage the GAINAGE switch for that raw, broken oscillator sound. Fresh, baby, yeah! Dial it, turn up, drop down or whatever tone you're in.

DS7 Distortion
The most versatile Ibanez distortion pedal ever, the DS7 is capable of producing a wide range of smooth, dynamic overtones. From a subtle level-boost to wall-to-wall rock 'n roll crunch, the DS7 delivers days of sustain and gain of gain.

SM7 Smoothbox
The Smoothbox is the most aggressive weapon in the Tone-Lok distortion arsenal. Armed with generous amounts of gain, light low end, and soaring highs, the Smoothbox is THE heavy rock sound for the contemporary guitarist.

LF7 Lo-Fi
The first dedicated low pedal for the guitar, the CF7 voltage controlled modes high and low pass filters allow you to emulate transistor radio and megaphone tone sounds. Best of all the end of a signal chain in combination with other pedals, the locking tone knobs receive wide adjustments of far more than previously required a massive rock of analog electronics. The Lo-Fi also performs equally well with vocals, drum machines, or in any "low-down" context.

TS9 & TS9DX TUBE SCREAMERS

The TS9 reissue features the same careful hand wiring and analog circuitry as the original classic. Like almost all of the original TS9's, our reissue features the TA7556B IC chip. The TS9DX Turbo Tube Screamer features the slightly warmer JRC4558B IC found in most of the other TS900 Tube Screamers and also offers three new settings for increased low end crunch: +, Hat, and Turbo.

"Lok'ed and Loaded! With their tough metal cases and rotating controls, these specially built Ibanez Tone-Lok pedals can take an exact punishment as they kick out."

—Dennis Dime, *Guitar World*, January 1991

CASES & ACCESSORIES

Accept no substitutes!

Protect your investment by insisting on the genuine article. Generic look alike cases designed to fit everything rarely fit anything right. Only Ibanez cases and bags are made to fit the unique shape of Ibanez guitars and basses. If it doesn't say Ibanez on the case, it isn't an Ibanez.

New you can have it all. Well, at least you can carry it all in style. The ingenious new Ibanez GBP and BBP combination bags feature a separable backpack and heavy-padded gig bag.

TREMOLOS

In the last twenty years no other guitar maker has done as much to advance the art and science of the tremolo as Ibanez. We spend so much energy on trem designs because tremolos aren't just devices for lowering or raising pitch—they're as important to the ultimate tone of your guitar as the body wood or pickups. For 2010, the new Edge Pro, Edge Pro II and ZR double-locking systems take tremolo technology another giant step forward. The smoothness, stability, and simplicity of our non-locking tremos such as the SAT and FAT systems redefine the term "standard tremolos."

ZR "ZERO RESISTANCE"

- Double-locking tremolo
- Roller bearings allow smoother movement without knife-edge friction
- Die-cast bridge plate offers signature Ibanez tone
- Built-in intonation adjustment tool
- Tremolo arm tension adjustment
- Incorporates Zero Point system
- Featured on all 5 models

EDGE-PRO

- Double-locking tremolo
- Low-set saddle makes tremolo easy
- Upgraded version of the original Ibanez Edge and Iii-Pro Edge
- Strings can be installed with or without ball end
- String holder block is part of the saddle—blocks can't fall out during stringing
- Die-cast bridge follows the shape of the fretboard for a more comfortable right hand feel
- String rests on front portion of saddle to provide extra string tension for arming and superior return to pitch
- Rounded steel saddle "chip" offers increased sustain and longer string life
- Available on all Ibanez Prestige and Signature Models (except K7 and JS100) featuring a locking nut system
- Double Edge-Pro equipped with pieces for accessing acoustic guitar tone

EDGE-PRO II

- Double-locking tremolo
- Die-cast bridge plate with recessed Mele knife edge plate offers signature Ibanez tone
- Strings can be installed with or without ball end
- String holder block is part of the saddle—blocks can't fall out during stringing
- Die-cast bridge follows the shape of the fretboard for more comfortable right hand feel
- String rests on front portion of saddle to provide extra string tension for arming and superior return to pitch
- Arm has lock height and tension adjustments
- Featured on the JS100, RG142 and all RG300 Series models

ZERO POINT SYSTEM

- Consistent return to the zero point (center point) after arm use, guitar returns to tune
- Guitar will remain in tune even after a G, B, or high E string breaks (depending on tension setting)
- Tremolo will not move during "boogie strapping" in major segments of recording sessions without locking tremolo
- Quick tension spring adjustments without removing bridgeplate
- Zero Point system is easily removable to allow tremolo to "flex"

DOUBLE SAT

FAT-10

FAT-20

SAT-30, DOUBLE SAT

- Wider pitch stud spacing provides better response than standard bridge designs
- Saddle design allows only the front section of the 2pc saddle to raise or lower (back section remains locked) for more stable intonation
- Patented one-screw/ridge plate system allows the string height to be raised or lowered without loosening the intonation lock screw
- Pop-in tremolo arm with arm swing tension adjustment
- Double SAT model equipped with pieces for accessing acoustic guitar tone

SAT-10, FAT-10, FAT-20

- Wider pitch stud spacing provides better response than standard bridge designs
- Die-cast staggered saddles follow the shape of the fretboard radius
- The string height is controlled by the two height adjustment stud screws
- Pop-in tremolo arm with arm swing tension adjustment
