1. UNDERSTANDING YOUR DEVICE

1.1 General info

ILIUM X250 is a smart phone, such as Android version 4.4, 1.2 GHz Quad Core Processor, 2 MP Digital Camera, etc.

Position of Keys

1. USB Port	2. Front Camera Lens
3. Volume Control Key	4. Touch Screen
5. Menu Key	6. Home Key

| 7. Back Key	8. Earpiece
9. Earphone Jack	10. Power Key
11. Flash	12. Battery Cover
13. Camera Lens	

## 2. PREPARING YOUR PHONE

2.1 Inserting the SIM card

Turn your cell phone over and remove the back cover and the battery.

Insert the SIM card correctly in the slot for the card

2.2 Inserting the memory card

Insert the memory card into the slot until it snaps into place as indicated in the image below.

## 3. BASIC FUNCTIONS

3.1 Turning ON/OFF

Make sure that the SIM card, the battery and the Micro SD card are installed and then press the Power Key to turn on the cell phone.

Turning Off the Device, long press the Power Key. Three options will be shown, Select "OK" to confirm.

3.2 Notifications

Notification bar: At the top of the screen, the status bar displays the time, the status and the notifications. Move the status bar down to display the notification page. Here you can review missed calls, new messages, etc. Finally, slide the status bar up to restore it.

3.3 Accessing the launcher

Tap the launcher icon [::::] on the home page to open the main menu, and press the home key [🏠] or back key [🔙] to return to the home page.

4. CUSTOMIZING

4.1 Setting the wallpaper

You can customize the wallpaper of your Home screen with

default wallpaper or with pictures taken from your device.

- In the idle mode, tap Menu Key > WALLPAPERS.

4.2 Customizing the home page with widgets and more icons

Take the following steps: On idle screen press Menu Key and the option WIDGETS, long press the widget or icon until the phone vibrates > release.

4.3 Relocating or removing widgets, and more on the home page

Press and hold the widget or icon you want to relocate or remove.

The phone will vibrate and display "Remove" next to the phone's receiver. Move the widget or icon you want to delete or relocate.

5. APPLICATIONS

5.1 Email

Your device allows you to compose, read and send emails.

5.2 Browser

The Browser is the tool which enables you to access the Internet.

5.3 Calculator

Calculator helps you perform basic arithmetic functions, such as addition, subtraction, multiplication and division.

5.4 Clock

This function gives you an access to the alarm clock.

- Go to ⊞ → Clock, Tap 🕐 > tap ➕ to add alarm.

5.4 Gallery

You can view the captured images, recorded video clips, and downloaded images in the Gallery.

The picture folder and video folder will be displayed.

Select to view the camera pictures or camera videos. The images or videos will be displayed in thumbnails.

5.5 Camera

Your device is equipped with a camera and camcorder that enable you to capture photos and videos.

6. SPECIFICATIONS

Screen	4.0 inch （WVGA）
Battery	1400mAh
Dimensions	124.6x64.4x9.95 mm
Weight	106.5 g
Standby Time	Up to 300 hours*
Maximum Talk Time	Up to 5 hours*
Power Adapter	Input: 100-240V～50/60Hz 120mA

Output: 5V/700mA

7. ALL RIGHTS RESERVED

While all the efforts have been made to ensure the accuracy of contents in this manual, we presume no responsibility for errors or omissions or statements of any kind, whether such errors are omissions or statements resulting from negligence, accidents, or any other cause. We operate a policy of continuous development and reserve the right to make changes, modifications and improvements to the device, device features / specifications or any of its parts without prior

notice.

♻ ENVIRONMENTAL CONCERN

Help us save Our Environment…GO GREEN..!!

All our endeavors are directed towards providing environment friendly products to you. The materials used in our devices are recyclable and can be reused to make new products. We strive to make products that are safe for our consumers as well as the environment. Come join hands with us and make world a better place to live.

Preserve natural resources for future generations by recycling your phone. The phone contains some metals, when recycled properly these can be put back into circulation, decreasing the need for new metal mining. Recycling reduces the need for raw materials, saves energy, helps mitigate Global Warming and reduces pollution, reduces waste products in landfills; therefore preserving natural resources for the future and saving the planet.

Federal Communication Commission Interference Statement

This device complies with part 15 of the FCC Rules. Operation

is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

FCC Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.

▸ RF Exposure Information (SAR)

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.   Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the poser required to reach the network.   In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the model device as reported to the FCC when tested for use at the ear is 0.92 W/kg and when worn on the body, as described in this user guide, is 0.9 W/kg (Body-worn measurements differ among device models, depending upon available accessories and FCC requirements.)

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model device is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: ZC4X250.

For body worn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and be positioned a minimum of 1.0 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the handset a minimum of 1.0 cm from your body when the device is switched on.
