Please insert available Subscriber Identity Module (SIM) card into your phone before using it. SIM card is supplied by your network carrier. All the information related to network connection is recorded on the SIM card, so are the contact information such as names, phone numbers and SMS that you set to store on the SIM. You can take out the SIM card from the phone and insert it into another GSM phone to use it. Most new phones will recognize the SIM card automatically.

Charging the battery

A new battery is partially charged. The battery icon at the upper-right corner shows the level of charging status.

- Plug the small end of the charger into the micro USB port of the device, and plug the large end of the charger into an electric socket.
- After being fully charged, disconnect the device from the charger. First unplug the charger from the device, and then unplug it from the electric socket.

Always use authentic accessories to optimise your battery performance. Non-authentic accessories (eg. chargers) can damage your battery and even your phone.

Optimise your battery performance
Here are some tips to help you optimise your battery performance.

- Always ensure that your phone profile is appropriately set to meet your actual usage.
- If you are not using Bluetooth, Wi-Fi, GPS or other applications, turn them off.
- Adjust the intensity of your display screen's backlight to low or medium level and for the shortest duration.
- Avoid using or placing your phone near magnetic objects (eg. a radio or television) or on metal surfaces, which will impact the network connection and ultimately drain power from your battery.

The phone does not switch on

The phone does not switch on
Remove/reinstall the battery. Then charge the phone until the battery icon stops scrolling. Unplug the charger and try to switch the phone on.

The display shows IMSI failure
This problem is related to your subscription.
Contact your operator.

The network symbol is not displayed
The network connection is lost. Either you are in a radio shadow (in a tunnel or between tall buildings) or you are outside the network coverage area. Try from another place, try to reconnect to the network (especially when abroad), or contact your network operator for assistance/information.

The touch screen responds slowly or improperly
If your device has a touch screen and the touch screen is not responding properly, try the following:

- Remove any protective covers from the touch screen. Protective covers may prevent the device from recognizing your inputs and are not recommended for touch screen devices.
- Ensure that your hands are clean and dry when tapping the touch screen.
- Restart your device to clear any temporary

software bugs. Ensure that your device software is upgraded to the latest version. If the touch screen is scratched or damaged, take it to your local dealer

Your battery seems to over heat You might be using a charger that was not intended for use with your phone. Make sure you always use the authentic accessory shipped with your phone. You can not send text

messages
Some networks do not allow message exchanges with other networks. First check that you have entered the number of your SMS centre, or contact your operator for detailed information on this subject.

You feel that you have missed some calls
Check your call divert options.

The display shows SIM failure
Check that the SIM card has been inserted correctly. If the problem persists, your SIM card may be damaged. Contact your operator.

The phone does not switch on

Your phone is not charging
If the battery is completely flat, it might take several minutes of precharge (up to 5 minutes in some cases) before the charging icon is displayed on the screen.

The picture captured with the phone camera is not clear
Make sure that the camera lens on both sides is clean.

Your device freezes or has fatal errors
If your device freezes or hangs, you may need to close programs or reset the device to regain functionality. If your device is frozen and unresponsive, remove the battery and try to switch the phone on. The device reboots automatically. If this does not solve the problem, perform a factory data reset. On the list menu, tap Settings>Backup & reset > Factory data reset .

Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using a headset, ensure that it is properly connected.

Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to, if necessary.
